FTSE Women Leaders Review

Achieving Gender Balance

February 2024

I am delighted that we have reached gender parity on our board. This is ahead of our stated ambition and reflects the importance we at Rolls-Royce place on increasing diversity at all levels throughout the organisation – as well as the work that we do in the community to encourage children and young women into STEM careers.

We have also increased the number of women on our Executive team in the last year and, while we have more work to do at lower levels in the organisation, we recognise the importance of setting both an example at board level and clear expectations throughout our company and our industry.

I would hope that through the encouragement of diversity and inclusion our women apprentices and graduates of today will see gender parity as the norm as they progress through their careers.

Dame Anita Frew
Chair of Rolls-Royce Holdings plc

FTSE Women Leaders Review

Nimesh Patel

Co-Chair
FTSE Women Leaders Review

The past year has marked another progressive year for British business. Leaders have once again demonstrated their continued focus on achieving greater gender balance at all levels of their organisations. Our Report highlights improvements across all dimensions – Women on Boards, Women in Leadership and Women in the top four roles.

Reaching the 40% women on FTSE 350 Boards milestone this time last year, three years ahead of our target, marked the culmination of over a decade of progress. It serves to demonstrate what can be done when we come together in pursuit of an ambition, which at first felt almost unattainable despite being unequivocally the right thing and the best thing for business.

And now, we need to emulate this success for women in senior leadership positions. While the number of women in senior executive decision-making forums has increased, the rate of improvement needs to step up. To meet our target of 40%, we will need to see a woman appointed into every other senior leadership position; that means around half of all roles. With the current cadre of talented women, the collective focus on diversity of perspective and greater equity in our Leadership teams, this is not an insurmountable challenge.

This transformation of the face of British business is in no small part due to the people behind the work of the Review: Denise Wilson and her team, and also our generous and long-standing joint sponsors, KPMG and Lloyds Banking Group, for their unwavering support and commitment. Finally, we would like to thank the Department of Business & Trade and Government Equalities Office for their long term and continued support of the Review which has been a critical component of its success.

We cannot understate the important role of leaders and advocates in creating this step change and for the last 14 years. Denise Wilson has been exactly that, shaping this incredible journey which has increased Women on Boards from the paltry 9% when the Review published its first report in 2011. Denise has been our driving force, both passionate and thoughtful on how to bring those who shared our views, and those who didn't, on a journey voluntarily by influencing hearts and minds and effecting real change at a pace that initially felt to many to be unattainable.

Denise will be stepping down as CEO of the Review at the end of March. She has so much to be proud of and we cannot thank her enough for the important contributions she has made. Our commitment is to continue building upon her excellent work. A succession process is well advanced, and we will announce the outcome in due course.

As Co-Chairs, we came to the Review as believers in the ability of British business to voluntarily, without quotas, achieve a significant change that is as good for business as it is for society. Amongst an ever-broadening list of competing priorities for business and some dissenting voices, we continue to work together to do the right thing for all women, embracing inclusion and diversity as a key lever for future success.

Thank you for all that you are doing.

Denise Wilson OBE

Chief Executive
FTSE Women Leaders Review

We pause at this time every year to reflect on near-revolutionary change in little more than a decade. A much-changed culture and dialogue at the top of British business, opportunities afforded to the skilled, capable women who otherwise would be waiting in the wings, and an ambition and near-normalisation of diversity at every level in the workplace. While many of the complex barriers to women's progression in the workplace have been removed, some harder ones remain, and without doubt there is more to do.

As I step down this year as Chief Executive, I am aware of the privilege and the trust placed in me by many in leading the work of the Review. It has brought more challenges than I could have imagined, but also overwhelming joy and the chance to bring real and lasting change. This is one of the most inclusive and collaborative business-led initiatives of its time and since 2010, very many people have contributed to the success of the Review, ensuring that it delivers progress, continues to adapt, and thrive.

I have Lord Davies to thank 'way back' for his leadership, extraordinary inspiration, recognising the need for this role, and in my appointment. Sir John Parker for his support as my Chair at National Grid over many years and encouraging me to 'give it a go'. Sir Philip Hampton for his companionship, challenge and sense of humour that lightened the load, and to Nimesh Patel and Penny James our current Co-Chairs, for bringing fresh impetus, understanding the enormity of what has been achieved and for their ambition to take it on to even greater heights.

Thanks go to present and past Steering Group members for sharing their knowledge so graciously and continually prompting the next set of questions. We have also been fortunate to have the backing of a succession of Government Ministers, enjoyed strongly supportive teams at BEIS/DBT and GEO over many years, and benefited from ever loyal and generous corporate sponsors in KPMG, Lloyds Banking Group, and Barclays before. They have collectively, and through differing times, obstacles, and distractions, ensured this vital work goes on.

I close with a mention to just a few outstanding teammates who have supported me in this role. Special thanks to this year's 'A Team', Charlie Godolphin and Zuzanna Witkiewicz on secondment from Lloyds Banking Group, and previously Kirti Mehta, Ishbel MacLean and Lucinda Longmore. To Adam Davison and team Honey who have kept all our technology ticking nicely, and by my side for a decade Itiola Durojaiye from former BEIS, and Sanu di Lima for always having a 'Plan B'. Mary Walsh and KPMG's Krishna Grenville-Goble and our brilliant creative designer Mike Poole, who for the last nine years has brought the myriad of rich data in this report not just to life, but made it sing!

And to everyone reading this, thank you for playing your part.

Two Words from our Sponsors

Bina Mehta

Chair
KPMG UK

We have seen great progress in women's representation at leadership level since the launch of the Review more than a decade ago. Achieving the 40 percent target for women on boards last year, three years ahead of deadline, was a significant milestone – and this year we have made further progress towards the broader 2025 target, with 35 percent of women holding leadership roles.

This progress, achieved through voluntary action, without quotas, is encouraging and demonstrates the power of businesses working together toward clear goals while holding each other to account.

I am confident we will achieve our ambitions of 40% female representation across the whole leadership level, but with just two years of the review remaining, we need to maintain focus.

At KPMG 44% of Board positions are held by women and we have increased women in leadership positions this year to 44%. We're proud to be featured in the 'Top Ten Best Performers' table for Women in Leadership. We're also pleased that two out of our four key roles are now filled by women – exceeding the recommendation of 'one in four'. I believe our firm is reaping the benefits of that gender balance in the decisions we make and in the service we offer our clients.

While setting the tone from the top is crucial, so too is attracting and retaining a strong pipeline of talented women from all backgrounds. It's fantastic to see that across the Review, we are seeing equal numbers of women and men being recruited into organisations and progressing through the ranks. We know that lasting, sustainable change requires consistent and significant effort; if we're not pushing forwards, we risk going backwards.

There are no quick fixes here, however the efforts we are making today will benefit all of the UK in future.

Finally, I would like to thank Denise Wilson OBE for leading this work since 2011 when the Davies Review first started, with such passion, drive and dedication. She leaves a profound legacy of improved gender parity in business that will help drive sustainable growth and benefit future generations.

Sir Robin Budenberg

Chair
Lloyds Banking Group

The business case for embracing diversity is clear; not only is it the right thing to do, but it serves as a catalyst for richer discussions, improved decision-making, fostering top talent and building trust among colleagues, customers and investors. In the midst of socio-economic complexity and uncertainty, companies with diverse voices round the table will be better equipped to navigate uncertain futures and deliver long term sustainable returns.

Lloyds Banking Group are proud to co-sponsor the FTSE Women Leaders Review, alongside KPMG, and we are pleased to have now met all the recommendations ahead of the 2025 target date. We have made significant strides in gender balance. Today, 45.5% of our Board and 46.9% of our Leadership population are women and we have proudly climbed from 73rd position in the 2017 FTSE 100 Rankings to the 5th place we hold today.

The integration of diversity goals into the Group Executive Committee Scorecard demonstrates our top-down commitment and accountability for diversity, equity and inclusion. Regular reporting on these goals, coupled with meticulous attention to detail in recruitment, retention and nurturing the talent pipeline, has been instrumental in driving the significant progress we have achieved.

Yet we recognise the job is not done and are committed to continuous improvement. That is why we have set a new aspiration: achieving a leadership team that reflects the society we serve, with a target of 50% women in senior roles by 2025.

This latest report from the FTSE Women Leaders Review demonstrates the journey to revolutionise the top of British business is well underway. Yet with just two years left to achieve the 40% women in Leadership target, it is imperative that all businesses actively contribute to this shared goal. As business leaders, the responsibility lies with each of us to serve as role models for inclusive leadership, fostering an environment that creates fairer and more equitable outcomes for everyone.

May I also express my heartfelt thanks to Denise Wilson OBE who has been an inspiring force in leading the Review over many years. Her vision, passion and relentless pursuit of gender equality have not only put this issue at the heart of British business practices but have also set a remarkable standard for others to follow.

Executive Summary

A year of steady gains for Women in Leadership roles of FTSE 350 companies, but with more to do. The representation of women on FTSE 350 Boards has increased beyond the 40% target, with almost two years to go until the end of 2025, and evidence there is room for more progress.

The FTSE Women Leaders Review is the UK's voluntary, independent and business-led initiative, supported by Government and aimed at increasing the representation of women on FTSE 350 Boards, and in their Leadership teams. The FTSE Women Leaders Review is the third and successor phase to the Hampton-Alexander and Davies Reviews, and this report brings to a close year three of a five year term.

Scope and Ambition

The UK's approach is unique and arguably the most ambitious in scale of any country working hard today to achieve gender equality in business.

The scope of the Review includes 400 of the biggest public-listed, and private companies in the UK. It captures over 26,000 leadership roles, and reports on progress for women serving on boards (Women on Boards), and for women in the two senior management layers below the board (Women in Leadership).

In just over a decade, diversity in leadership has become a core and critical business agenda item. The learnings and rich data set grow each year, as does the effort and ambition of many companies working to achieve gender balance at the top of British business.

FTSE 350 Companies Achieving 40%

Women in Leadership

The **FTSE 100** has made reasonable progress overall this year, with stronger progress at Executive Committee level. The number of women in the Combined Executive Committee & Direct Reports has increased to **35.2%**, up from 34.3% last year.

The appointment rate of women has remained constant at 41% of all available roles in the year going to women. Against a backdrop of reductions in the overall population of Executive Committee & Direct Reports for the second year running, and a lower turnover, an increase in the representation of women is welcome news.

The **FTSE 250** has made similar progress this year, with the number of women in the Combined Executive Committee & Direct Reports increasing to **33.9%**, up from 32.8% last year.

There has been some churn in the FTSE 250 Index, but with the number of Investment Trusts reasonably stable at 86 this year, the sharp increases in previous years appear to be plateauing.

As for drivers of progress, the turnover has remained relatively high, but there has been a disappointing drop in the appointment rate of women with 36% of all available roles in the year going to women, and a reducing year-on-year overall Executive Committee & Direct Reports population.

The representation of women on FTSE 100 Executive Committees has reached 30% for the first time, with still more to do. The number of All-Male Executive Committees in the FTSE 350 has reduced to just nine this year, down from an astonishing 54 in 2017.

In a familiar story, progress for women in the CEO role across the FTSE 350 has remained flat, with marginal gains offset by losses elsewhere. Better news on the functional roles, in particular the FTSE 100 Finance Directors and the Chief Information Officer, where both have seen gains, and are being recognised increasingly as stepping stones to the CEO role.

Over half of all FTSE 350 companies have met, or are well on their way to meeting the 40% target for Women in Leadership. That leaves just under half with still some way to go, and a re-doubling of effort required in the next two years.

Women on Boards

The **FTSE 350** has seen further gains this year, moving up to **42.1%** women's representation, an all time high, and evidence there is appetite for more progress.

The number of women in the SID role has increased again this year to 47%, and near-parity. Despite several newly appointed women Chairs during the year, gains were offset by more women Chairs stepping down, which resulted in a small net loss.

The UK compares well internationally, with the FTSE 350 again in second place behind quota-led France, and ahead of Norway. What continues to surprise other countries working to increase women on public-listed boards, is the sheer size of ambition in the UK. With 350 public-listed companies and almost 3000 board seats in scope, the UK out-runs most of its international counter-parts in both progress and scale.

Country	Number of Companies in Index	Quota or Voluntary	Total Women on Board	% Women 2023
France	40	Quota	252	44.7%
United Kingdom	350	Voluntary	1243	42.1%
Norway	25	Quota	87	41.6%
Australia	100	Voluntary	337	40.2%
Spain	35	Quota	177	40.1%

FTSE Women Leaders Progress

Top 50 Private Companies

In this second year of reporting, it is clear that many of the Top 50 Private Companies have been working hard to improve diversity. Thank you to all 46 private companies that responded to the request this year. Their willingness to participate, and progress so far aligns well with their public-listed peers.

Looking Forward

With sustained effort from those companies within striking distance of the target, and significantly increased effort from those companies still adrift, the FTSE 350 should meet the 40% target for Women in Leadership by the end of 2025.

There have been a number of competing voices recently offering contradictory opinions, some saying that progress for women has 'gone far enough'. The Review aims to drive gender balance at the top of British business, and stands firm in its efforts to do that, ensuring a fairer, more equitable workplace for all women.

There is no shortage of capable, experienced women and the pipeline has never been stronger, with sustained ambition from business, all is set fair for further gains to come.

Ofcom's job is to make communications work for everyone. That's why we and the companies we regulate need to build diverse workforces that are representative of citizens and consumers across the UK.

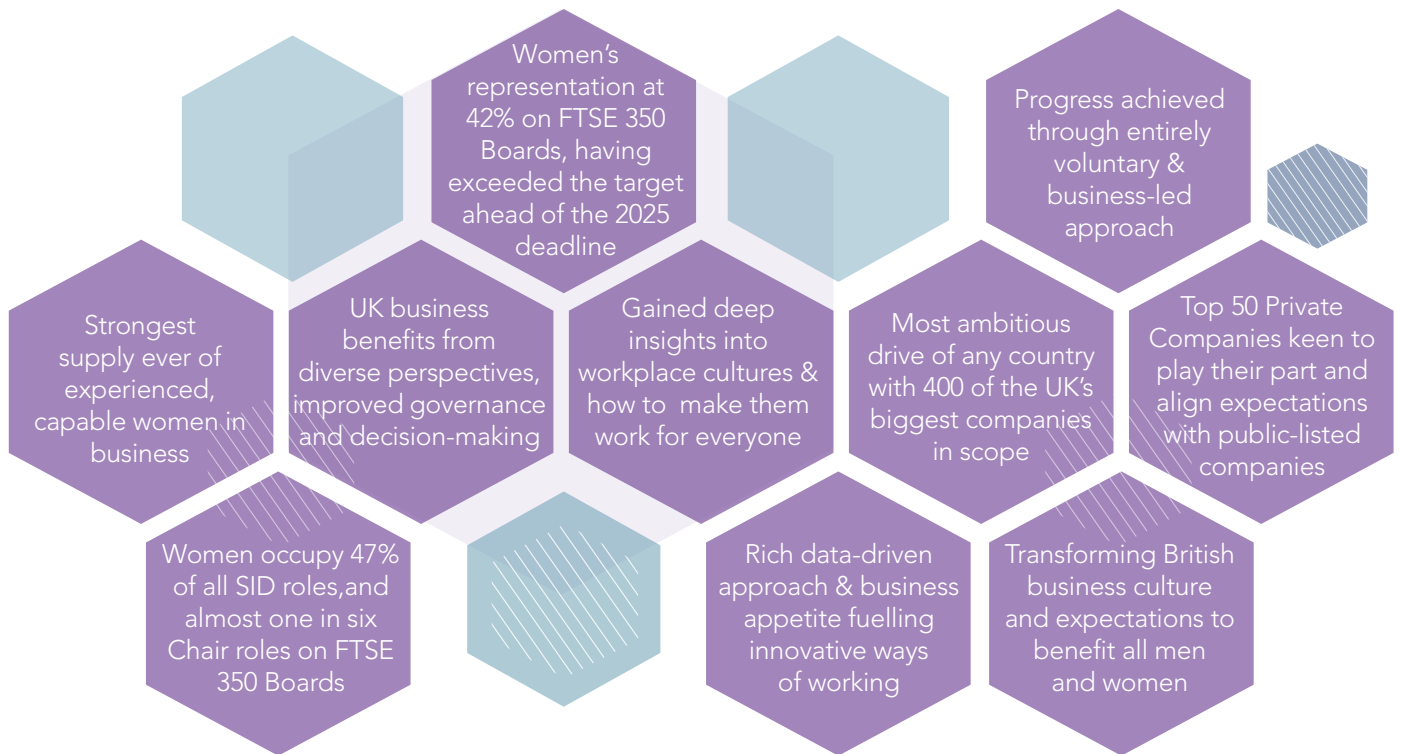

We've been pleased to see progress in broadcasting with more women in senior roles on and off camera. Through our "Together in Tech" programme we're championing representation of women in the telecoms sector.

However, despite the rising number of women in senior roles the world is still not always comfortable with women having power. This is why we must keep working hard to support and champion women's progress.

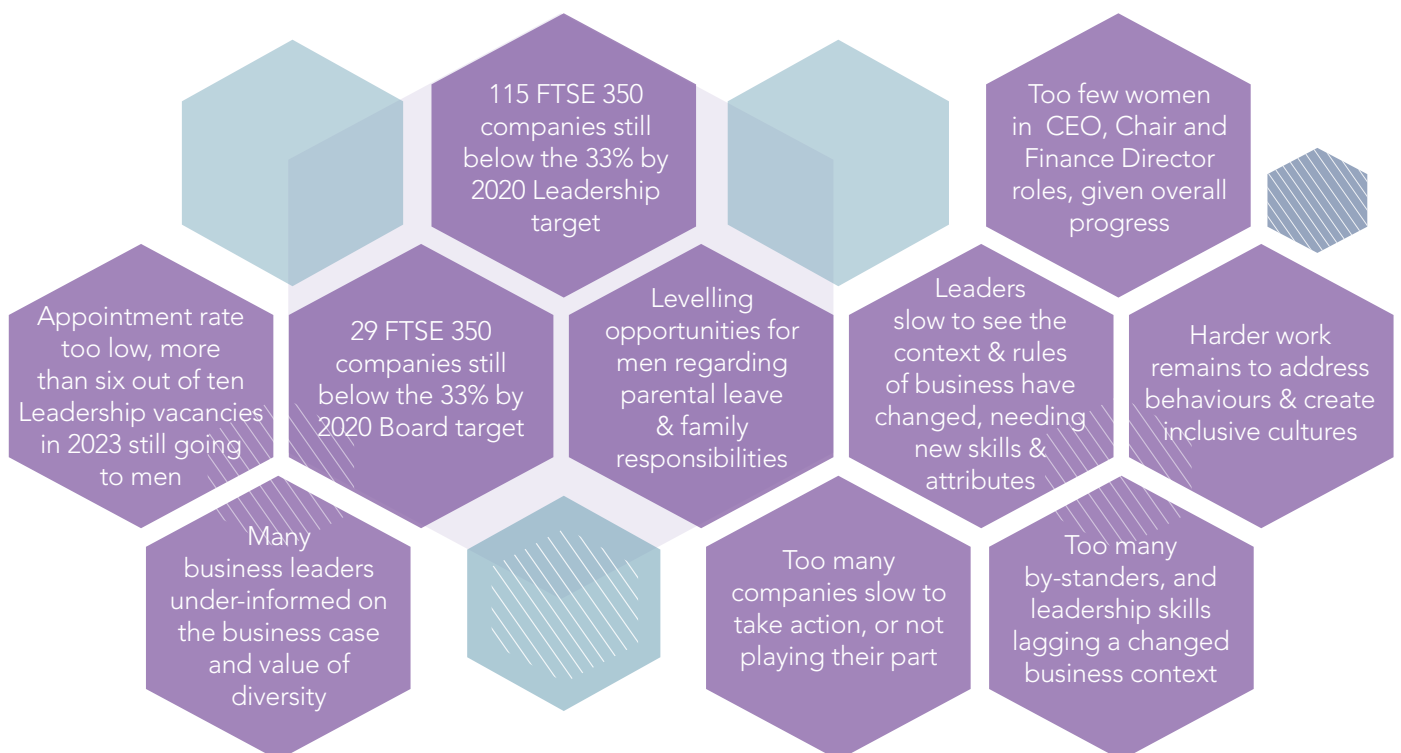

Dame Melanie Dawes
Chief Executive,
Ofcom

Progress comes in many forms...

... but still more work to do

1. Executive Committee & Direct Reports

FTSE 100 Progress in 2023

The representation of women in FTSE 100 Leadership roles has increased steadily again this year to over 35%, against a reduction in the total number of roles. A significant uplift in the appointment rate however, is needed in the next two years to meet the 2025 target.

The representation of women in Leadership, that is the Combined Executive Committee & Direct Reports¹, has risen to 35.2%, up from 34.3% last year. This is against a lower turnover, and a reduction in the total number of roles available in the year by over 400, leaving a reduced Leadership population of 8784 roles.

The other key driver of progress, is the appointment rate which has remained constant, with 41% of all available roles in the year going to women. However, that will need to increase to around half of all roles going to women in the next two years, based on the turnover and total number of roles remaining similar, in order to meet the 40% target by the end of 2025.

The Highs

The threshold to feature in the 'Top Ten Best Performers' list continues to be over 45%, up around 10 percentage points on the 2017 threshold of 35%. Ambition from companies, investor and other stakeholder expectations continue to rise. The companies that recognised the benefits of gender diversity some years ago, are now leading the way, able to harness improved decision-making and the power of diverse perspectives.

Burberry Group Plc have increased their women's representation again this year, holding the number one slot in the Top Ten Best Performers for another year. New entry Marks & Spencer Group Plc appears in second place with 51.3% women, and Next Plc a consistent player in the top three since 2017, is in third place.

National Grid Plc, Lloyds Banking Group Plc and Diageo Plc feature for the first time. Pearson Plc, Haleon and BP Plc retain their place, and AstraZeneca Plc is a re-entry.

Top Ten Best Performers

	Company	Combined Executive Comm & DRs	Sector
1	Burberry Group Plc	55.2%	Consumer Products & Services
2	Marks & Spencer Group Plc	51.3%	Personal Care, Drug & Grocery Stores
3	Next Plc	50.6%	Retail
4	National Grid Plc	48.7%	Utilities
5	Lloyds Banking Group Plc	46.9%	Banks
6	Pearson Plc	46.4%	Media
7	AstraZeneca Plc	45.7%	Health Care
8	Diageo Plc	45.6%	Food, Beverage & Tobacco
8	Haleon Plc	45.6%	Health Care
10	BP Plc	45.5%	Energy

Across a range of sectors, public-listed companies have shown they can adapt to a changed business context and use it to their advantage, enhancing the UK's reputation as a modern, and effective place to do business.

The complete FTSE 100 Company Ranking can be found on page 50.

1. Executive Committee & Direct Reports

FTSE 100 Progress in 2023

Although half of all FTSE 100 companies have now met, or are well on their way to achieving the 40% target, a significant other half have yet to meet the 33% target set for the end of 2020, by the Hampton-Alexander Review.

There are less than two years to go until the December 2025 target end date, and with an average of just under 2% progress each year across FTSE 350 companies, many organisations now have a significant gap to close.

FTSE 100³ Companies Already Achieving 40%

Functional View

The aim of the Review has always been a simple yet important one - to improve the representation of all women, in all leadership positions. The dominance of women in the Human Resource Director roles, not long ago majority male-led, is to be welcomed. The pendulum will likely re-balance in time. There is excellent progress for women Chief Information Officers this year, and good progress for Women Finance Directors, which has been traditionally a typical career path to the top CEO role.

Sector View

A new and unique set of data has emerged in this last decade of reporting. It not only shows representation at company level, turnover and appointment rates, but has enabled sector insights which have both validated, and challenged expectations.

A mix of sectors appear in this year's Top Ten Poorest Performers table, evidence that sector alone matters less than previously thought. Surprising entries from Retail, Health Care, Travel & Leisure, which are amongst the best performing sectors for women in the FTSE 350 Index,

Top Ten Poorest Performers

	Company	Combined Executive Comm & DRs	Sector
1	Fresnillo Plc	12.1%	Basic Resources
2	Endeavour Mining Plc	18.4%	Basic Resources
3	Antofagasta Plc	19%	Basic Resources
4	Ashtead Group Plc	19.8%	Industrial Goods & Services
5	Frasers Group Plc	22.2%	Retail
6	Airtel Africa Plc	22.4%	Tele communications
7	Diploma Plc	22.7%	Industrial Goods & Services
8	Intertek Group Plc	23.6%	Industrial Goods & Services
9	Hikma Pharmaceuticals Plc	24.5%	Health Care
10	Entain Plc	24.7%	Travel & Leisure

and have strong representation of women elsewhere in the organisation. Irrespective of sector, without a plan of action and purposeful leadership, women continue to be under-utilised and under-represented.

The Lows...

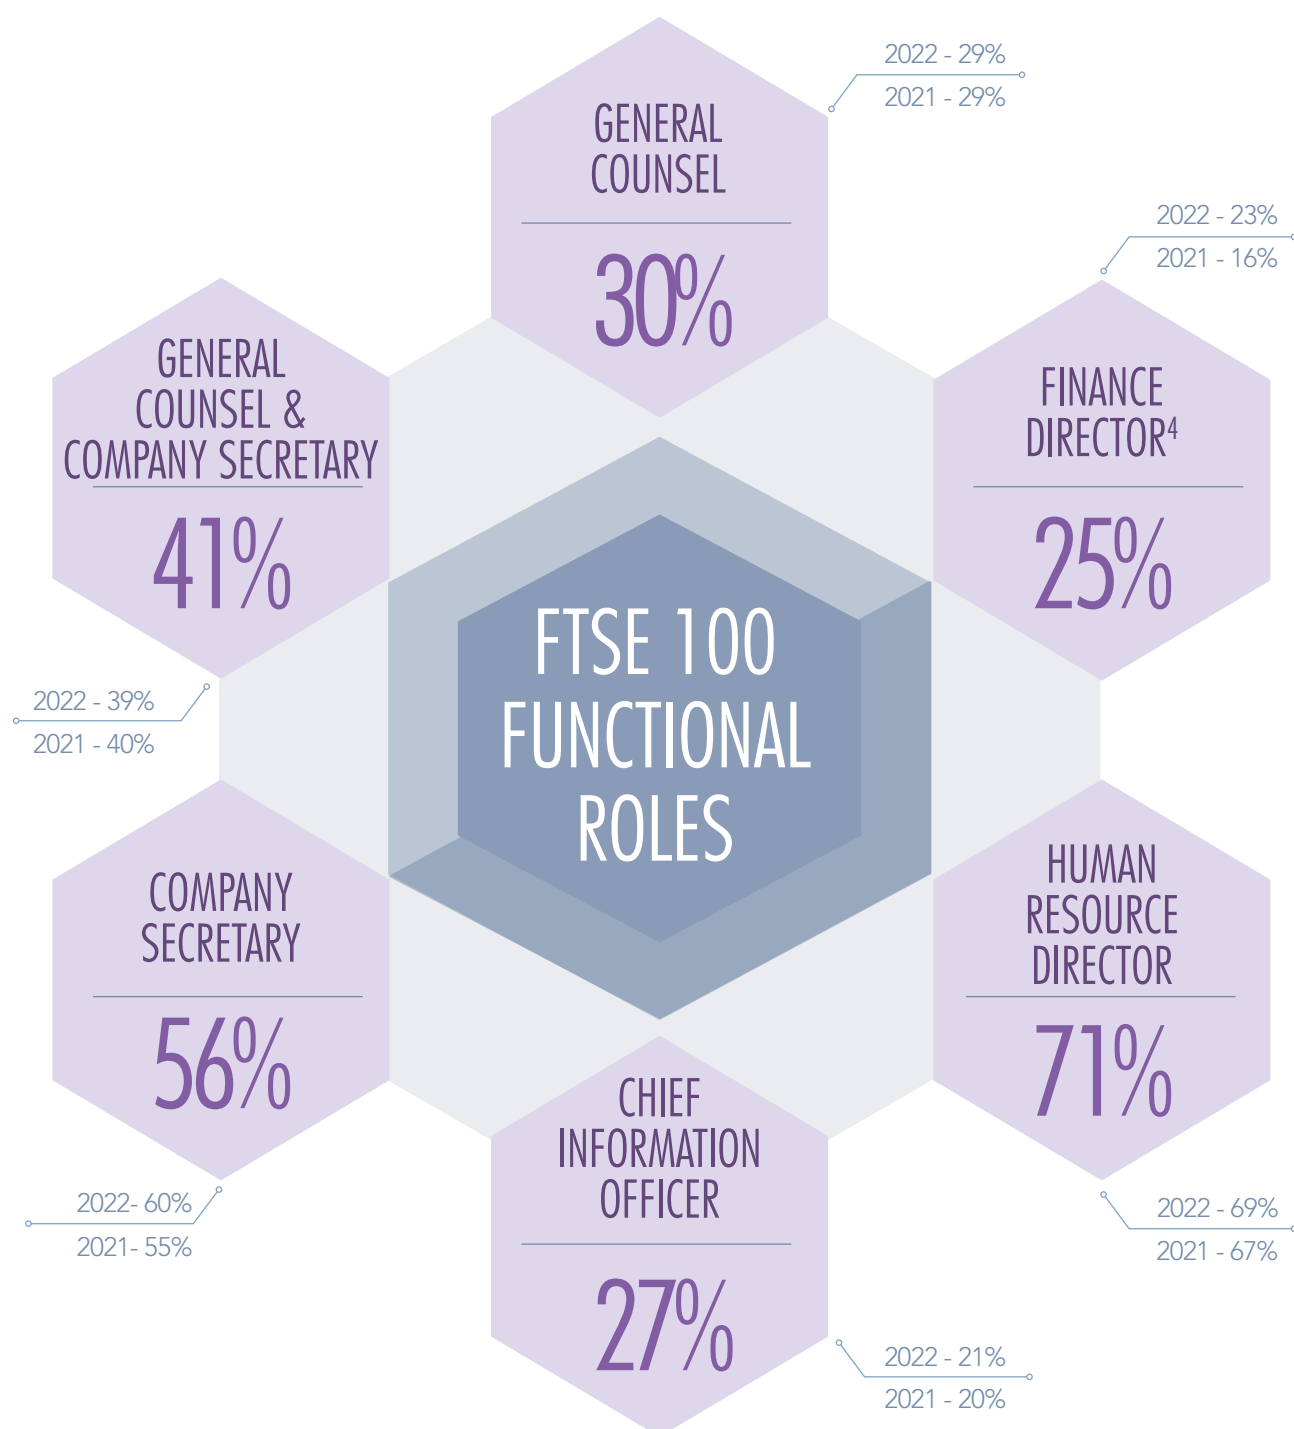

The entry threshold for the Top Ten Poorest Performers this year is between 12.1% and 24.7% at best. This compares to an at 'best in range' of 16.9% in 2018. Despite the wider range, improvements year-on-year are marginal, with the companies featured largely unchanged. However Ashtead Group Plc, Intertek Group Plc, Frasers Group Plc and Antofagasta Plc, have all made progress in the year. Of the four new entries in 2023, only Diploma Plc has made progress, and all are perhaps finding themselves unexpectedly in an unflattering spotlight.

Endeavour Mining Plc have fallen back in the year, and Fresnillo Plc take bottom place after seven years in this table, falling to just 12.1%. They remain also the only All-Male Executive Committee in the FTSE 100.

3. There are only 97 companies in the FTSE 100 in scope, excluding three Investment Trusts, which have no employees to declare.

Women in Functional Roles

Good progress continues again this year for women in the Finance Director and Chief Information Officer roles. The Finance Director is a well recognised route to CEO, and the Chief Information Officer newly emerging as an alternative pathway. However, in these two roles, and in the General Counsel role, there is still some way to go.

Nick Hampton
Chief Executive Officer
Tate & Lyle PLC

I'm driven by our purpose of Transforming Lives through the Science of Food, which we live by supporting healthy living, building thriving communities, and caring for our planet. To do this effectively, we must understand and represent the diversity of the communities we serve, and I'm proud of the work we do to ensure that our workforce represents the diversity of our customers, consumers, and broader society.

When I first started at Tate & Lyle, our leadership team looked very different to today. We have purposefully corrected that through considered hiring practices, leadership development, creating a more inclusive culture, and employee support. We now have a Board that is 50% women, an Executive Committee where women make up 56% of the team and are on track to meet our 2025 target for gender parity in all leadership roles.

In my experience, having visible leadership that represents our employee population is not just good for engagement, it also drives performance and fuels innovation, and demonstrates there is opportunity for everyone to realise their potential in our organisation.

Through our expertise we develop solutions which reduce sugar, calories, and fat, add fibre and protein, and provide texture and stability in food and beverages.

This puts us right at the centre of the future of food - creating sustainable, affordable, and nutritious products to meet the needs of today and tomorrow. A purpose of this significance requires diverse perspectives and experiences to ensure that we are meeting the needs of both consumers and the planet.

We are now applying learnings on gender to increasing representation in other dimensions, starting with ethnicity and race.

My perspective on Equity, Diversity, and Inclusion is grounded in my own experience as a father of three girls and wanting to ensure they can thrive without barriers as they go out into the world. All parents should feel their children have access to opportunities that help fulfil their true potential.

For now, I will continue to shape an organisation where this is the case and fight to ensure we progress inclusion in its broadest sense, both here at Tate & Lyle but also with our partners across the world.

Empowering women and girls leads to wider economic growth and prosperity around the world. It's the right thing to do and it makes us stronger. I'm proud of our collective work to make Tate & Lyle a more gender balanced workplace. Our unique differences generate better ideas and deeper insights, empowering us to lead the next food revolution for and with our customers.

Lyssa McGowan
Chief Executive Officer
Pets at Home Group Plc

As a young girl growing up in the 1970's and 80's I had a thirst to prove what I was capable of and a hunger to succeed. But gendered adjectives like bossy, pushy, and arrogant (not strong, capable and confident) aimed to put me back in my (woman's) place. This was an era when women had to be more macho than the guys just to get a place at the table. I knew I would have to get there in spite of being a woman.

As a young woman at work in the 90's and 00's I of course had my share of nasty "me too" moments, but society also shifted. I was lucky to have great and generous mentors of both sexes who reached down to pull me up. Women in leadership forums, gender diversity targets, networking sessions all helped me find my way. I felt very strongly that I had an obligation to lead because I was a woman. But that is a pretty narrow platform on which to stand, and a lot of pressure to heap on your own shoulders.

Today, I feel I can lead simply and authentically as a woman, informed of course by being female, but not defined or constrained by it. I am grateful every day that I live in a time in history and a place in geography where that is true: for billions of women around the world it remains a fierce and distant dream.

My own journey has fuelled a passion for diversity and inclusion in all its wonderful forms. I love to bring teams together including people from all walks of life, understanding that everyone has had their own journey and their unique struggles. Forging a path forward together is a beautiful human endeavour, and it makes for a better business!

At Pets we have brilliant women, men, minority ethnic, LGBT, neuro-diverse, less-able, young and old vets, groomers and retail colleagues from right across the UK. Our strength is in our diversity and the way we work together to bring the best products, services and advice to guide the nation's pet lovers to take the best care of their cats, dogs, rats, rabbits, guinea pigs, fish, snakes, chickens, monitor lizards.....

That's because we are all united by a common purpose: to create a better world for pets and the people who love them.

Pets

1. Executive Committee & Direct Reports

FTSE 250 Progress in 2023

The representation of women in FTSE 250 Leadership roles has increased steadily again this year to almost 34%. The appointment rate for women has fallen to just 36% overall, which means more than six in every ten available roles in the year, went to men.

The representation of women in Leadership, that is the Combined Executive Committee & Direct Reports⁵, has risen to 33.9% from 32.8% last year, with similar progress on Executive Committees and for Direct Reports during the year.

Following several years of increasing numbers of Investment Trusts entering the FTSE 250, this year the qualifying companies versus Investment Trusts, appears to have stabilised. There are 164 qualifying companies, with the average size of the Executive Committee, the Direct Reports populations remaining largely constant.

As for drivers of progress, the turnover has increased again this year and remains relatively high, at 30% for both women and men together. There has been a disappointing drop in the appointment rate of women with 36% of all available roles in the year going to women, and a slightly reducing year-on-year total number of roles in the Executive Committee & Direct Reports population.

The Highs

Law Debenture Corporation Plc have moved into first place this year with 59.1% women in Leadership. The Shaftesbury Plc and Capital & Counties Properties merger however, has resulted in both companies leaving the Top Ten Best Performers.

Good news for Integrafin Holdings Plc who move up into second place, with ITV Plc, Pets At Home Group Plc, Moneysupermarket.com Plc, Spire Healthcare Group Plc and Syncona Plc all holding their own again this year in the table.

Top Ten Best Performers

	Company	Combined Executive Comm & DRs	Sector
1	Law Debenture Corporation Plc	59.1%	Financial Services
2	IntegraFin Holdings Plc	53.8%	Financial Services
3	ITV Plc	52.4%	Media
3	Virgin Money UK Plc	52.4%	Banks
5	Assura Plc	52.2%	Real Estate
6	Pets At Home Group Plc	50.9%	Retail
7	Moneysupermarket.com Group Plc	50.8%	Technology
7	Spire Healthcare Group Plc	50.8%	Health Care
9	Playtech Plc	50.5%	Travel & Leisure
10	Baltic Classifieds Group Plc ⁶	50%	Technology

On the back of significant progress, Assura Plc is a new entry this year taking fifth place. Virgin Money Plc and Playtech Plc, also new entries have made good progress, and move in at fourth and ninth place respectively. Baltic Classified Group Plc, Genuit Group Plc and Watches of Switzerland all new entries, are tied in tenth position.

FTSE 250 Progress in 2023

Well over half of qualifying FTSE 250 companies have now met, or are well on their way to achieving the 40% target. However, there are still 69 companies that have yet to meet the 33% target set for the end of 2020, by the Hampton-Alexander Review.

While there are still two years to go until the December 2025 target end date, with an average of just under 2% progress each year across the FTSE 350 Index, in a familiar theme to the FTSE 100, many organisations now have a significant gap to close.

FTSE 250⁸ Companies Already Achieving 40%

At or above 40% women At or above 33%, but below 40% women Below 33%

The majority of companies have made progress during the year, with those companies recognising diversity in leadership as a core and critical business issue many years ago, having made the most progress. However, the investor focus is now firmly on action beyond the boardroom. This is encouraging faster progress in companies that have been slow to recognise diversity as a business imperative.

The Lows...

The entry level criteria for the Top Ten Poorest Performers table has increased to 20.7%. This compares to at a 'best in range' of 10.8% in 2018.

Renishaw Plc takes top slot as the poorest performing company in the FTSE 350 for women in Leadership, having slipped backwards for a second year running. Amongst other regular entries, W.A.G Payment Solutions Plc and Clarkson Plc have gone further backwards, while there is modest, but welcome progress for a second year running from Hill & Smith Plc.

Top Ten Poorest Performers

	Company	Combined Executive Comm & DRs	Sector
1	Renishaw Plc	10%	Industrial Goods & Services
2	W.A.G Payment Solutions Plc	12.5%	Industrial Goods & Services
2	Hochschild Mining Plc	12.5%	Basic Resources
4	Clarkson Plc	13.4%	Industrial Goods & Services
5	Hill & Smith Plc	14.6%	Basic Resources
6	Keller Group Plc	14.7%	Construction & Materials
7	Tritax Big Box REIT Plc	18.2%	Real Estate
8	Ashmore Group Plc	20%	Financial Services
8	OSB Group Plc	20%	Financial Services
10	Aston Martin Lagonda Global Holdings Plc	20.7%	Automobiles & Parts

All-Male Executive Committees		Years Running
Aston Martin Lagonda Global Holdings Plc	10 Men	2 years
Savills Plc	8 Men	6 years
Hochschild Mining Plc	7 Men	Re-entry
Foresight Group Holdings Ltd	6 Men	New in 2023
Primary Health Properties Plc	5 Men	New in 2023
BBGI Global Infrastructure S.A.	3 Men	5 years
Bellway Plc	3 Men	3 years
International Distributions Services Plc	3 Men	Interim structure only

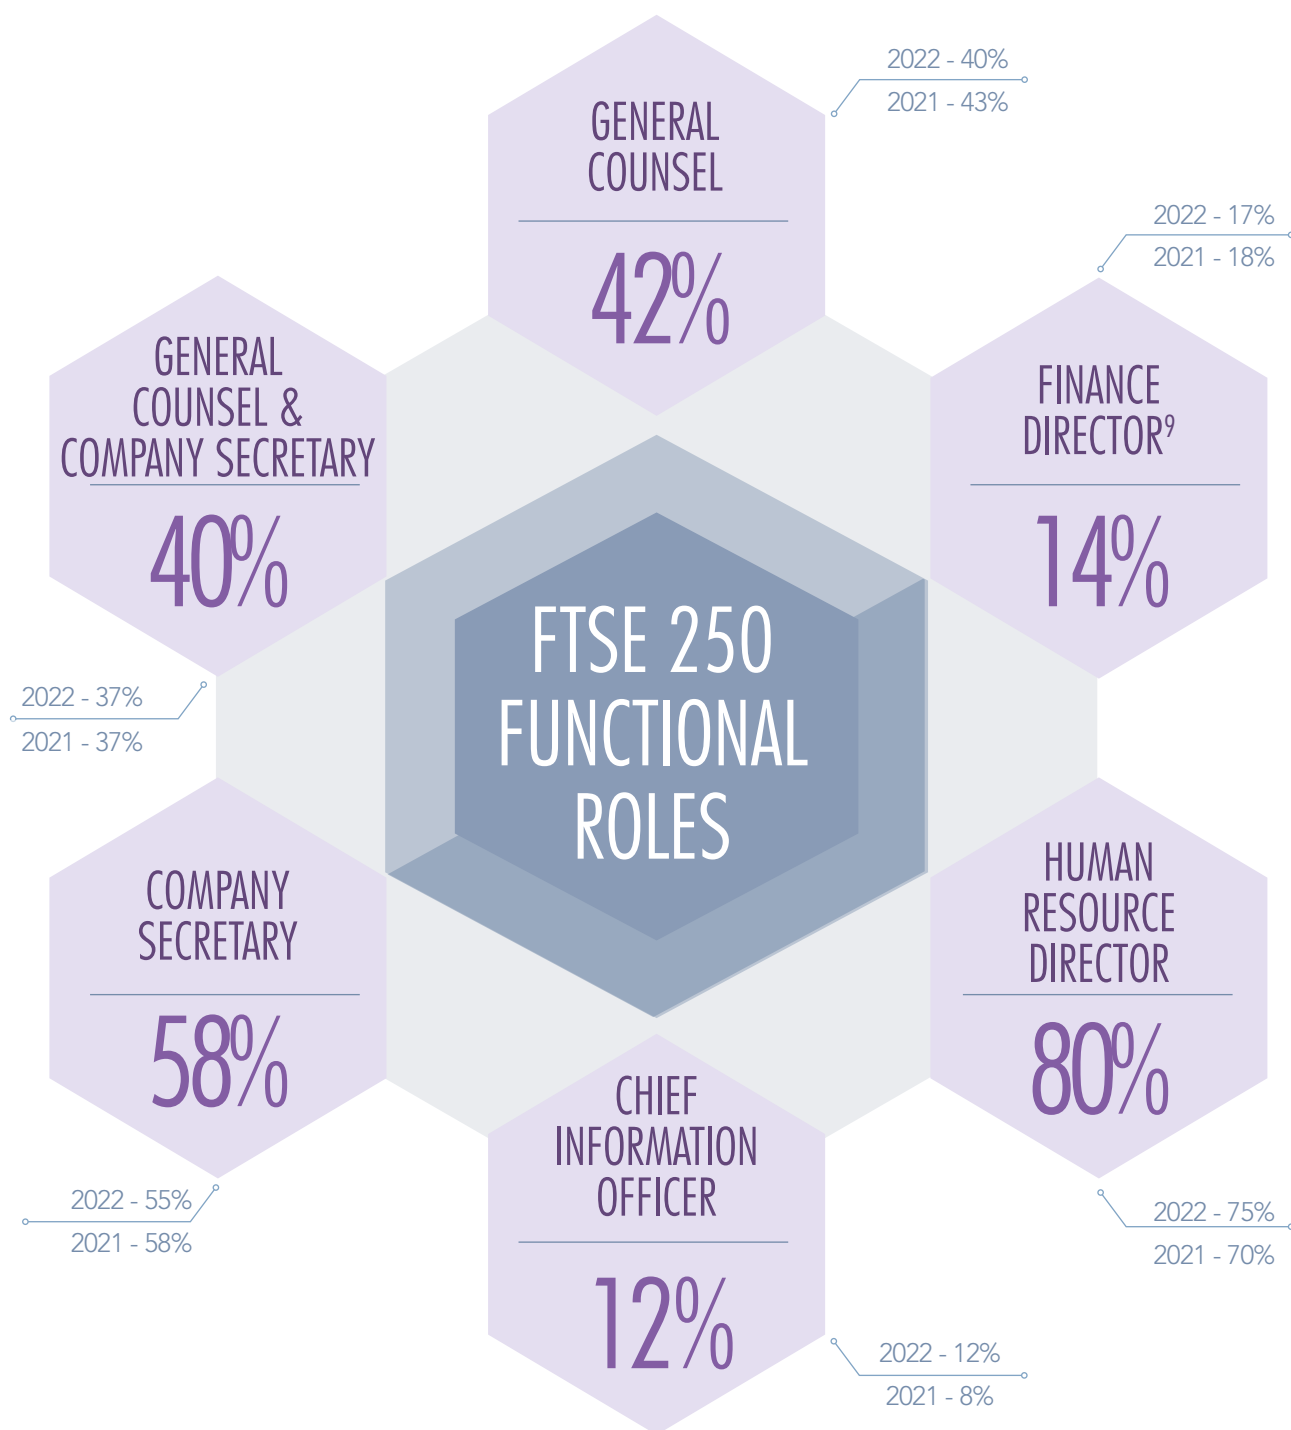

Significant progress has been made in reducing the number All-Male Executive Committees over the years. The downward trend continues this year with just 9 All-Male Executive Committees in the FTSE 350, decreasing from an astonishing 50 in 2018.

Savills Plc, BBGI Global Infrastructure S.A. and Bellway Plc are regular entries, and appearing unconcerned at an All-Male Leadership team, albeit increasingly adrift from peers, and somewhat out-of-touch.

8. There are 164 companies only in scope, excluding 86 Investment Trusts which have no employees to declare.

Women in Functional Roles

Above average increases this year leading to strong representation of women in all roles, except the Finance Director and Chief Information Officer. Unlike the FTSE 100, progress remains at best flat here in the year, and in a similar theme there is still some way to go.

A Shared Challenge, Gender Equality in the Workplace

When the context within which business operates changes, and so do the rules, there is often a lag before workplace practices and behaviours catch up which can be unhelpful, and undermine progress.

It is the role of every individual to ensure that the workplace provides an equal opportunity to all, and a safe environment in which everyone can achieve their full potential, and be at their best. However, the role that men play both in the workplace, and in the home, is pivotal to the career progression of women.

This is no new insight or revelation. What is new is the context within which both men and women co-exist in the workplace and the rules that govern this. When the context within which business operates shifts, as has been the case on diversity at work, structures and norms which have become commonplace, require a similar shift. The lag before workplace practices and behaviours catch up can be unhelpful, and undermine effort of others and overall progress.

22

The skills and attributes required in a modern-day leader, including the ability to build and manage a diverse team, are arguably lagging, and have yet to fully catch up. As have the behaviours that underpin this.

There is much anecdotal evidence that hearts & minds are in right place, but at this stage in the journey, is that enough? Too many people, both men and women are under-informed and fearful of the opportunity diversity provides. Unable to grasp the right language or behaviours, and lacking proper guidance, people take little or no action. This passivity, or 'opting out' then becomes part of the problem.

The page opposite explores what works, what helps fuel faster progress and allows everyone to share in the challenge to create a gender-equal workplace.

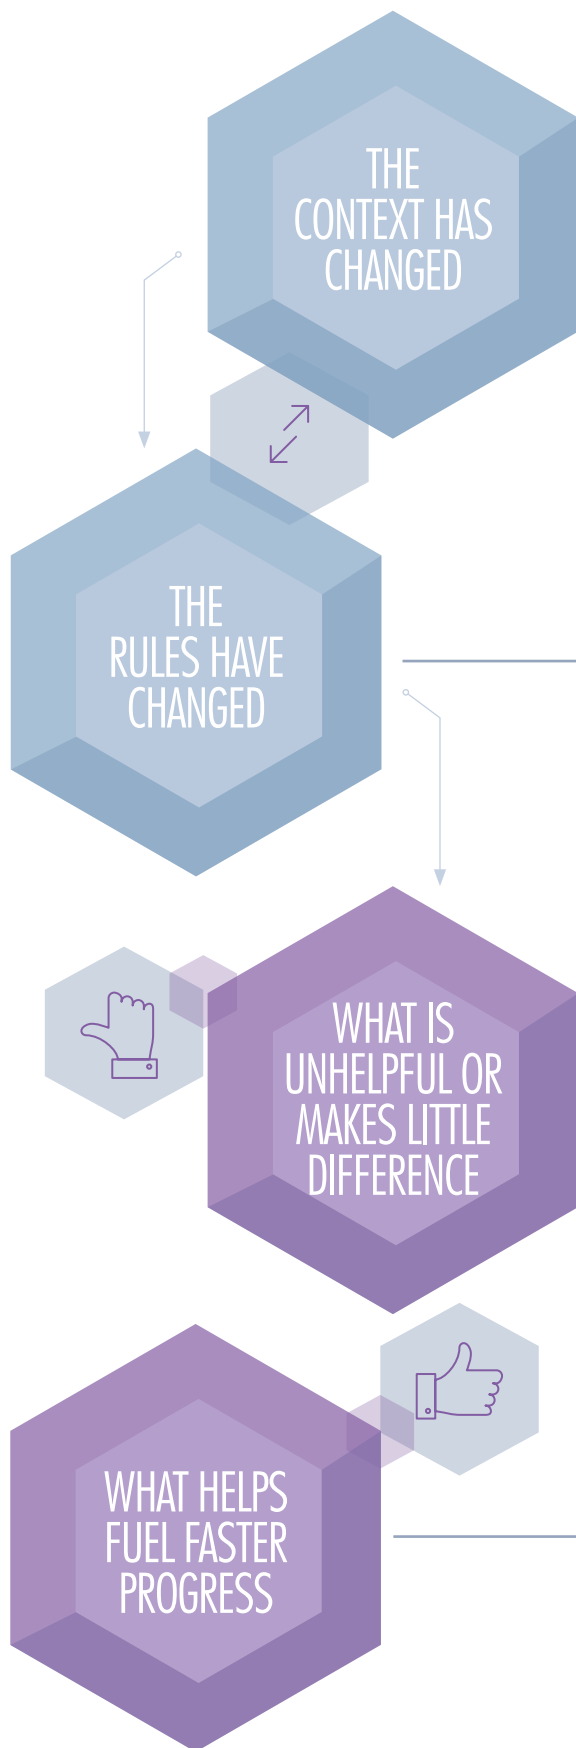

Breaking down traditional gendered parenting roles, and moving away from outdated ideas of masculinity is not just important for women, it's also essential to men's wellbeing, health and longevity.

We need dads to 'parent out loud' and be proud and transparent about their caring responsibilities at work. Equal Parental Leave, allows time for new dads to bond, learn how to parent independently and is a key enabler of gender equality for all.

Elliott Rae
Founder, MusicFootballFatherhood

- Rise of ESG on the corporate agenda as a key governance, performance and reputational issue
- Skills shortage, +50% women qualifying & in workforce
- Surfeit of research on business benefits and 'How to'
- Changing expectations from Gen Z/supply chain/public
- Dual income households, shared parental responsibilities
- Presumption society make-up will be reflected at work
- Rise of the employee voice and social media.

- Investor focus on diversity as business imperative, key to long-term success
- Good governance/regulation expects transparency and full disclosures
- Attract, manage and retain a diverse team as a leadership prerequisite
- Leaders needing to be well-versed on ever-widening range of topics
- Improved confidence and formal routes to report inappropriate conduct
- Public interventions, #MeToo, Black Lives Matter
- Unflattering spotlight on boys' club, banter and misogynistic chat.

- Lack of interest in performance, monitoring or setting of achievable goals
- Inflexible and out-of-date work practices
- Faux allyship where people speak out in private, but take no action
- Allowing excuses and myths to thrive and fuel defeatism
- Blind eye, passive tolerance, opting out
- Lack of Dad's/parents networking & support groups
- Lack of psychological safety for men and women.

- Treat like any other business topic, a plan of action, hard data and deliverables
- Leaders role modelling 'no-regrets' behaviours and ensuring authentic storytelling
- Men on men, senior men in particular engaging with younger men
- Taking an even share in the domestic load at home and parenting 'out loud' in the workplace
- Implement Equal Parental Leave policies, showcase and reward 'Dad' activity
- Listen to the voices of everyone, encourage women to play their part
- Read broadly, know the issues and enablers of success
- Mature conversations that set high expectations for all.

1. Executive Committee & Direct Reports

Closing out Year Three of Five

As we bring to a close this third year of five, the gap between those companies ensuring gender balance is firmly embedded in British business, and those companies doing very little and slowing the overall pace of change, has never been more obvious.

Driving for Gender Balance

Against a backdrop of considerable global uncertainty, increased competition and complexity, a temptation for business to focus on short-term action, over sustainable, long term outcomes, might have been expected. However for many British companies, that has not been the case. Ambition has been sustained over time for gender-balanced leadership teams, based on an acknowledged premise that diversity drives improved performance, innovation and a company's longer-term success.

That is not to say all companies are of the same view, or willing to play their part. What is known is that companies 'doing very little' slow the pace of change, and are dragging overall progress down. Leaders of such companies are urged to treat this like any other serious business issue, take action and lead a mature conversation, setting realistic expectations for all.

There has been an increase in the number of competing voices this year, with contradictory opinions that progress for women has 'gone far enough'. The Review was set up to drive for gender balance at the top of British business, and stands firm in its efforts to do that, ensuring a fairer, more equitable workplace for all women. This means women of all ages, ethnicities, disabilities, sexual orientations, from all backgrounds and nationalities.

Those Playing their Part

The average rate of progress across the FTSE 350 over time, is just under 2% increase in the representation of women. Each year many companies exceed the average, often as a result of sustained purposeful action and efforts in earlier years paying dividends. Several FTSE 350 companies saw much bigger gains with Marks & Spencer Group Plc, Games Workshop Group Plc, Intermediate Capital Group Plc and Essentra Plc, all improving strongly.

Those Doing Very Little

In the year 99 companies have made no progress, or worse gone backwards. Vistry Group Plc, Hammerson Plc, Harbour Energy Plc, J D Sports Fashion Plc and Whitbread Plc, were among the biggest fallers. It is disappointing to see hard-won gains drift back, and others barely leaving first base.

Appointment Rate Skewed Towards Men

The drive for more women in FTSE 350 Leadership roles below the board began in 2016. At that time, concerns were expressed whether gender balance at the top of British business was an achievable goal. Eight years on, these concerns remain unfounded, with experienced, capable women ambitious for themselves, and their organisation across every sector of British business.

However, bias in the selection process continues to slow progress. Of the 5102 Leadership roles available during this year, 62% went to men, increasing to 68% of roles going to men at Executive Committee level.

In any year since 2016, the best outcome has been 41% of all available appointments going to women. Despite the rhetoric the appointment rate in FTSE 350 Leadership teams, remains heavily skewed towards men.

Outlook

To achieve gender balance in the next two years, assuming the turnover and number of roles in the Leadership population remain constant, the appointment rate will need to increase to around 50/50 men and women. This is a realistic expectation at this stage in the journey, and means for every two appointments made in the year, one will be to a man and the other to a woman.

With sustained effort from those companies within striking distance of the target, and significantly increased effort from those companies still adrift, the FTSE 350 should meet the 40% target by the end of 2025.

FTSE 350: 40% Women in Leadership Target Met

Congratulations to the 68 FTSE 350 companies that have already met, or exceeded the target for Women in Leadership, and have done so two years ahead of the target date.

The Four Key Roles

Along with targets to achieve gender balance, progress for women into the most senior roles is also an important measure of success. The recommendation for women appointments in the four key roles, ensures focus at the top of organisations, and the UK's biggest, most influential roles benefit from diversity of experience and perspective.

Along with targets to achieve gender balance, progress for women into the very top jobs is also an important measure of success. Recommendation (2.) requests each FTSE 350 company to appoint at least one woman into the four key roles, Chair, SID, the CEO and the Finance Director.

Tracking progress of women in the four key roles encourages focus at the very top of organisations, and enables women to progress without limits. It also ensures the UK's most powerful and influential roles, often impacting employee outcomes, those of society and the economy, benefit from diversity of experience and perspective.

Chairs

The number of women Chairs in the FTSE 350 has increased every year since 2015. However, for the first time there has been a small net decrease in the number of women Chairs to 53 this year, from an all time high of 55 in 2022.

In the FTSE 100 two new women Chairs were appointed at BAE Systems Plc and Barratt Plc during the year. However, five women Chairs retired either at the end of their tenure, or for personal reasons. The quarterly re-balancing process resulted in one woman Chair loss in the year to the FTSE 250, Hargreaves Landsdown Plc, offset by one gain in Dechra Pharmaceuticals Plc.

The FTSE 250 has gained nine women Chairs during the year, offset against eight losses for varying reasons. This resulted in a small net increase in women Chairs to 37 this year.

Finance Directors

The number of women Finance Directors in the FTSE 350 has also reduced slightly this year to 48, from an all time high of 50 last year, with gains in the FTSE 100, offset by losses in the FTSE 250.

In the FTSE 100 there were an encouraging seven new women Finance Directors appointed at BP Plc, Croda International Plc, GSK Plc, Rolls-Royce Plc, RS Group Plc, Severn Trent Plc and WPP Plc.

An additional three companies appointed men where women Finance Directors were previously in post, with two companies Abrdn Plc and Hargreaves Landsdown Plc dropping in the quarterly re-balancing process to the FTSE 250.

Meanwhile in the FTSE 250, disappointingly just one company appointed a woman Finance Director in the last year. Several companies appointed men to the role in place of previous women, or companies left due to delisting or quarterly rebalancing, which resulted in a net loss of four.

The SID

The number of women Senior Independent Directors in the FTSE 350 has this year risen to near-parity at 47%, with the role playing a pivotal part in board governance and evaluation, succession planning and also as an important conduit for major shareholders.

Research in the last two years with Kings College London¹⁰, finds that holding a SID role prior to becoming Chair is valuable. However there are some differences in a typical journey to the Chair role between men and women, with ongoing monitoring helpful to ensure gaining SID experience does not become a prerequisite for women, while men are directly appointed as Chair. There appears some evidence this is the case. See bar chart opposite.

FTSE 100 Women's Progress in the Four Key Roles

10. The research combines descriptive data analysis and interviews with FTSE Chairs and SIDs

FTSE 100 Chairs, those appointed straight to the Chair role, those with SID experience

The CEO

Undoubtedly the stand-out disappointing statistic amongst a sea of progress at every level, and in most roles, is the number of women CEOs in the FTSE 350 today. In 2011 there were 15 women CEOs in the FTSE 350, and there are just 21 today.

There have of course been many more women CEOs appointed than a net increase of six indicates. However, to move forward over time all of the existing women CEOs need to remain in post, and some women also need to be appointed into positions vacated by men. Although several new women are appointed each year, these are not yet in sufficient numbers to offset men being appointed into positions vacated by women. A typical year results in marginal gains at best.

Although disappointing, to some extent it is not surprising. This role was always going to be the last hill to conquer, in a journey that is taking longer than it should. Furthermore, there are around 260 CEO roles on offer in the FTSE 350 Index only, excluding Investment Trusts where no such role exists. These are arguably the biggest, highest paid and most influential roles in British business. The turnover is low for obvious reasons given that the rewards, and accompanying profile are high.

Exploring the Challenges

An on-going reliance on 'traditional' career routes, narrowly drawn briefs and bias in the selection process, are all exacerbating factors, as is emerging evidence on shorter tenures for women. Recent research published by Russell Reynolds Associates¹¹ shows that only 19% of new CEOs appointed in the FTSE 100 during 2023 were women. There was also evidence of shorter average tenure and variances in the reasons for leaving.

Exploring the average tenure (2018-23) of departing women CEOs, their research found that FTSE 100 women held the role for an average 5.7 years, versus 6.7 for men.

This year's research with The Global Institute for Women's Leadership, looked at the current cohort of FTSE 350 CEOs and their two previous roles before becoming CEO for evidence of more varied career histories than in the past. That appeared not to be the case, with 91%¹² coming from 'traditional' routes, previous CEO, Finance Director, COO, Divisional Heads or founder/owner. Less than 10% had 'non-traditional' experience, e.g. CIO, HR Director, Strategy or other functional lead.

Encouraging Lead Indicators

There are a small, but encouraging number of lead indicators that may mean faster progress is on its way:

- A changed business context requires broader life & work skills to lead effectively
- FTSE 100: Women make up 30% of Executive Committees, 25% of Finance Directors and 27% of CIOs
- FTSE 350: Women make up 42% of Board members, with a few current CEOs appointed via NED roles
- Evidence of a growing number of CEOs appointed from 'non-traditional' career routes.

with special thanks to Minna Cowper-Coles

2. Top 50 Private Companies

Context and Progress in 2023

This second year of reporting for the Top 50 Private Companies has provided a clearer and more consistent benchmark from which to measure progress. Expectations are aligned with public-listed companies, encouraging wider progress in British business.

The Big 50

Thank you to all 46 private companies that responded to the request this year to submit their Board and Leadership Gender Data via the FTSE Women Leaders Review online Portal. This is an entirely voluntary ask, and the diligence and enthusiasm shown by private companies and their representatives during this second year of the process, has been most welcome. Their support enables diversity expectations at the top of large private companies to align with those of public-listed companies, encouraging further progress across British business.

The key guiding principles that determine the Top 50 list relate to annual turnover, workforce size, a UK headquarters and significant contribution to UK business and the economy. It includes private equity companies, partnerships, founder or family-owned companies, and those owned directly by management and staff.

The companies making up the FTSE 350 Index are subject to the London Stock Exchange quarterly re-balancing process, which can result in a changed make-up year on year, as companies exit, and others join. Modest changes to the make-up of the Top 50 have taken place this year as was appropriate, with Wates Group Ltd, Asda Group Ltd and Wm Morrison Supermarkets Ltd included for the first time, replacing New Look Ltd, Amalgamated Holdings Wilkinson Ltd and John Swire & Sons Ltd.

A reducing number of private companies however, were keen to keep their progress, or lack of, under wraps. We look forward to reporting next year on the four companies that 'chose not to respond' this year.

Women in Leadership

In this second year of reporting, it is clear that many of the Top 50 Private Companies have been working hard to improve diversity. Their willingness to participate, and progress so far, aligns well with their public-listed peers.

The increased confidence this year from private companies offers a more reliable baseline on which to measure future progress and greater assurance that like-for-like management structures are being compared across the Top 50 and with like populations in FTSE 350 companies.

There has been a welcome increase in the representation of women in the Combined Executive and Direct Reports to 36%, with 15 companies already at or above 40% and a healthy turnover and appointment rate.

Women on Boards

Meanwhile progress for Women on Boards of the Top 50 has been flat in the year at around 31%, and considerably behind their public-listed counterparts.

This may be partially explained by differing, and more static board structures in private companies. There is also greater polarisation at board level among the Top 50, with around a third performing strongly at 40% women on their boards, and more than half trailing well below 33%, and down to zero.

See Appendix E, page 66, for further details on the Top 50 and Sector performance.

The Changing Skills & Attributes in Leadership Survey

Exploring how the requirements of leadership have changed today, whether skills and attributes of current leaders have caught up and what inspires young people in the leaders they look up to, and in the world of work.

The foundations of good leadership were set out as being well-versed in the business, a sharp intellect, able to deliver strong returns, to lead the way and to act with the highest standards of integrity. However, in these ever-changing times business leaders face complex issues, many which will be unfamiliar, and many which rarely touched business in the past. There is a need to be informed on a wide range of topics, from sustainable carbon neutral business, to wellbeing and mental health in the workplace, and the expectations of Gen Z, all of which require new skills & attributes.

The premise of the survey was that the context within which business operates has changed radically in the five to ten years, as have the rules within which it operates. The survey asked what skills and attributes respondents considered essential for today's leaders and their top priorities, how this might impact their own aspirations as leaders of the future and what would encourage young people to want to stay in the workplace.

Whereas hard and fast conclusions require some caution when drawing from a relatively small sample size, the responses received they did appear to indicate a lag, or perceived lag at least in leaders demonstrating the full range of skills & attributes that responders considered essential in leadership today. Also, employees seem to be alert to this issue, and watching.

Only 42% of responders felt confident that the leaders in their organisation have or are rapidly acquiring the required leadership skills and attributes to be an effective leader in today's business environment.

When asked does more need to be done to create a fair and equal playing field for women, 75% agreed in the context of their own organisation and that number increased to 91% agreed in regards to UK business.

The survey was widely shared via mail and LinkedIn social platforms to business stakeholders between November 2023 and January 2024 and resulted in just under 300 responses across various business sectors. Thank you to all those who participated.

Caoire Blakemore

Responsible Business Director
A. F. Blakemore & Sons Ltd

Carol Welch

Chief Executive
A. F. Blakemore & Sons Ltd

Last year we changed our Diversity & Inclusion governance, so that each area is sponsored by an Executive Leader, with a diverse lead who is often has lived experience of the focus area, in support.

We also launched 'Our Women in Blakemore' awards with over 350 inspiring nominations, including for our male award SupportHer. We aspire to develop a more diverse set of talent into our senior leadership positions, and recently launched two Women in Leadership

apprentice schemes aimed at mid and senior level women, addressing the barriers that may be preventing progress.

This covers everything from psychological courage and ambitious guilt to strategic leadership and managing change. There is so much more we can do, but schemes like this open more opportunities for women, and in return develops our pipeline of talented women.

"I was brought up to believe you can do anything you put your mind to regardless of gender but have realised this unfortunately doesn't always translate into real life. I'm determined to use my privilege to level the playing field in driving inclusion and diversity. Working with those around you is the biggest strength you can have – to take advice and opinions from all kinds of colleagues makes for better business. But also spreading the ownership of Diversity & Inclusion depends on the strength of those around you also – it can't just be a solo voice.

As a mother I've learnt first-hand how hard it is to juggle work and home life, but also the presumptions that you get lumbered with. Creating a gender plan that takes into consideration the whole woman is key – long gone are the days where you are expected to separate the professional you, and the authentic you."

"Being brought up in a traditional North-East culture means I'm passionate about seeking out and creating inclusive environments that enable everyone to be the best they can be.

At AF Blakemore inclusivity isn't just an initiative, it is woven into our DNA, 'The Blakemore Way' defines our purpose, values, and the way we behave to enable teams to give their all. Inclusivity is critical in our retail teams. Our SPAR stores are community anchors, so it is vitally important that we understand the broad needs of customers in communities we serve. Likewise, our supply chains teams are some of the most diverse in the business and creating an inclusive environment which allows them to contribute is a priority."

3. Women on Boards

3. Women on Boards

FTSE 100¹⁵ Progress in 2023

Further gains this year for women on FTSE 100 Boards, and evidence there is room for more progress. Eighty six companies have four or more women on their board, now an established career route for senior women and their contribution never having been more significant, or valued.

The FTSE 100 exceeded the 40% target in 2022, three years ahead of the deadline date. The representation of women has increased further this year to 42.6%, with 445 women serving on FTSE 100 Boards out of a total of 1044 directorships. All achieved through an entirely voluntary and business-led approach, and evidence of greater gains still to come.

The turnover is slightly up year-on-year, but the appointment rate of women is near-parity, appearing to have stabilised at around 47%, for the third year running.

There have been two new women Chairs appointed in the year, offset against several long-serving women Chairs stepping down, and overall net loss.

The number for women in the SiD role is up by 11 this year to 48. In a not unfamiliar theme, and one of the last hills to climb, the number of women in the CEO role remains largely flat. However, women Finance Directors, commonly the only other Executive role on the board, is up at 25% women this year. It is here where the most work is still to do.

Meanwhile, it is cause for celebration that an alternative career path at the board table, in the past largely unavailable to women, has opened up as a new opportunity for experienced women in the later stages of their careers.

There are now 75 companies with at least one woman in the four key roles, Chair, SID, CEO & FD. A small number of companies have a woman in three out of the four key roles, Severn Trent Plc, Diageo Plc and Croda International Plc. A further 17 companies now have two women in the four key roles.

FTSE 100 Journey to 40%

In excellent progress, nearly three-quarters of all FTSE100 Boards have now met, or exceeded the 40% target. The boards of four FTSE 100 companies have still to meet the 2020, 33% Hampton-Alexander Review target. These four companies have some way to go to catch their peers, and feature in the Poorest Performers chart opposite.

The complete FTSE 100 Company Ranking can be found on page 50

15. All FTSE 100 Women on Boards data as at 11th January 2024, unless otherwise specified.

Women Board Members by Company

The Highs

Perhaps unsurprisingly, nine companies in the Top Ten Performers table have a woman in at least one of the four key roles, excepting Auto Trader Group Plc.

The Top Ten Best Performers table shows some consistency again this year, with seven of the companies featured all regular entries. Welcome to Marks & Spencer Group Plc and for the first time, RS Group Plc.

In another sign of progress, the 'One & Done' Board no longer features in the FTSE 100 Index, and has not for some years. Eight FTSE 100 companies have a majority of women on their boards, unique in the history of British business.

Top Ten Best Performers

Rank	Company	Women on Boards	Sector
1	Severn Trent Plc	75%	Utilities
2	Diageo Plc	70%	Food, Beverage & Tobacco
3	Rightmove Plc	57.1%	Real Estate
4	Auto Trader Group Plc	55.6%	Technology
4	RS Group Plc	55.6%	Industrial Goods & Services
6	Marks & Spencer Group Plc	54.5%	Personal Care, Drug & Grocery Stores
6	Pearson Plc	54.5%	Media
8	Schroders Plc	53.8%	Financial Services
9	Burberry Group Plc	50%	Consumer Products & Services
9 ¹⁶	BP Plc	50%	Energy

The Lows

Howden Joinery Group Plc are a surprising entry, having moved up into the FTSE 100 this year, but previously having been close to 40% women on their board.

Airtel Africa Plc moves up as the poorest performer in the FTSE 100 having dropped back further in the year. They are closely followed by fashion retailer, Frasers Group Plc appearing two years in a row as the second poorest performer, with just 28.6% women on their board.

More than a decade on since the Davies Review set out clear expectations for women's representation on public-listed boards in the UK, several companies reputable in many other ways, are still struggling to embrace and retain women as leaders.

Top Poorest Performers

Rank	Company	Women on Boards	Sector
1	Airtel Africa Plc	27.3%	Telecommunications
2	Frasers Group Plc	28.6%	Retail
2	Howden Joinery Group Plc	28.6%	Retail

3. Women on Boards

FTSE 250¹⁹ Progress in 2023

The FTSE 250 has made further and similar gains to the FTSE 100 this year, moving beyond the 40% target for Women on Boards with still two years to go until the 2025 deadline.

The FTSE 250 Index has increased the representation of women on their boards further this year to 41.8%, ahead of the 2025 target deadline. The number of women on FTSE 250 Boards has increased again this year to 798 women, against a reduced total number of directorships.

The 41.8% achievement is an increase of 19 percentage points in six years, up from just 23% women in 2017, and represents an additional 345 women serving on FTSE 250 Boards in that time.

The turnover is slightly down this year, with the appointment rate continuing to be both strong and stable, at 46% of all available roles going to women, and clearly helping to fuel progress.

The number of women in the Chair and SID role rises each year, this year with a marginal increase to 37 FTSE 250 Boards being chaired by a woman, and a significant 114 FTSE 250 boards, almost a half with a woman in the SID role. There was only one woman CEO appointed in the year, and losses elsewhere resulted in a net loss of two.

There are now 163 companies with at least one woman in the four key roles, Chair, SID, CEO & FD. Of these, Hargreaves Lansdown Plc have a woman in three of the four key roles, and 20 companies each have two women in the four key roles.

Those companies embracing the business benefits of diversity, along with those that have most work to do are listed in the Rankings in Appendix C starting on page 54.

FTSE 250 Journey to 40%

The transformational change in the make-up of FTSE 250 boardrooms since 2015 is evident above. The vast majority have 33%, or more women at the table, with 163 of those boards now gender balanced with 40%, or more women. Only 25 boards remain predominantly male, either unaware of the changes around them, or confident in an increasingly isolated position.

Drivers of Progress	2017	2018	2019	2020	2021	2022	2023

19. All FTSE 250 Women on Boards data as at 11th January 2024, unless otherwise specified

There are 87 companies in the FTSE 250 that have four, or more women around the board table, with the average board size around eight members, and three plus women the most common. A long way from the 92 “One & Done” boards in the FTSE 250 in 2017.

The Highs

The Top Ten Best Performers table in the FTSE 250 this year includes only operational companies, and not any of the Investment Trusts, many of which would otherwise have featured in the Top Ten.

There are a total of 33 FTSE 250 companies with a majority of women on their boards, and a further 39 companies with 50% women. To feature in this year’s Top Ten Best Performers list, companies need to have an equal number of men and women on the board as minimum entry criteria.

There are now 18 Investment Trusts with 60% or more women on their boards, and a further 21 Investment Trusts with 50% or more women on their boards. See Appendix D, page 62 for more details on Investment Trust performance.

Top Ten Best Performers

Rank	Company	Women on Boards	Sector
1	Ascential Plc	71.4%	Technology

5	Syncona Ltd	57.1%	Financial Services
5	Ashmore Group Plc	57.1%	Financial Services
10	Drax Group Plc	55.6%	Utilities

Women Board Members by Company

The Lows...

Three years have now passed since the 33% target deadline for women on public-listed boards, and all except 25 companies have now met the 2020 target. There is often a correlation in a company that poorly performs on women board members and women’s representation in leadership roles within the company, but not always.

However, not all boards have moved forward in the year. There are 13 FTSE 250 companies previously with 33%, or more on their board that have fallen below the 2020 target this year. These include Ferrexpo Plc, Direct Line Insurance Group Plc, IG Group Holdings Plc and Indivior Plc.

A 33% “gating threshold” has been applied in the FTSE 350 Rankings which recognises the importance of making progress for women in Leadership roles, at the same time as sustaining progress made at board level. This year 27 FTSE 350 companies failed to meet the gating threshold.

FTSE 250: 40% Women on Boards Target Met

Congratulations to the 163 FTSE 250 companies that have achieved, or exceeded 40% Women on Boards at least two years ahead of the 2025 target deadline.

3. Women on Boards

UK Progress Compared Internationally

The FTSE 350 takes second place for another year, sitting just behind France where quota legislation has significantly fueled progress. The EU Women on Boards Directive, approved in 2022 is also beginning to drive faster progress in EU member states.

Compare and Contrast

The UK continues in second place with 42.1% women FTSE 350 Boards, and just behind France with 44.7% women on boards of the CAC 40 Index. In 2023 both countries have seen the highest-ever number of women on boards of their big, public-listed companies. France achieved this through quota legislation, and the UK via an entirely voluntary, business-led approach.

It is evident that the voluntary, business-led approach is working well for British business, as is the quota regime in France, albeit across a much smaller number of companies. Evidence clearly that both routes are effective in bringing about change, and for now, a debate for a decade seems at last to be waning.

What continues to be unique, and surprise other countries working similarly to increase women on public-listed boards, is the sheer size and scale of ambition in the UK.

With 350 public-listed companies in scope, nearly 3000 board roles which are tracked every year, and 1243 women in board positions, the UK out-runs most of its international counter-parts in terms of both progress, and scale.

2023 Performance Compared

Country		Number of Companies in Index	Quota or Voluntary	Total Directorships	Total Women on Board	% Women 2022	% Women 2023
France	CAC	40	Quota	564	252	44%	44.7%
United Kingdom	FTSE 350	350	Voluntary	2955	1243	40.2%	42.1%
Norway	OBX	25	Quota	209	87	39.1%	41.6%
Australia	S&P ASX	100	Voluntary	839	337	38.1%	40.2%
Spain	IBEX	35	Quota	441	177	37%	40.1%
Canada	S&P TSX	60	Voluntary	698	272	36.6%	39%
Netherlands	AEX	27	Quota	297	113	36.6%	38%
Belgium	BEL Institutional	19	Quota	222	84	38%	37.8%
Finland	OMX Helsinki	25	Voluntary	226	83	35.7%	36.7%
Sweden	OMX Stockholm	29	Voluntary	299	108	36.1%	36.1%
California	S&P	100	Quota	1223	417	33.6%	34.1%
Germany	DAX	40	Quota	844	287	32.4%	34%

Extending the Reach

Virtually no countries have extended their efforts to management layers below the board. Belgium has expressed intention, and France is in the process.

The UK continues to be somewhat unique in setting voluntary targets, tracking and reporting on progress in almost 23,000 FTSE 350 leadership roles, two layers below the board. More countries setting targets and measuring progress below the board, would be welcome. For now, admiration from the UK's international counter-parts, would seem merited.

Staying Ahead

In 2022 the European Parliament adopted the 'Women on Boards Directive' requiring EU member states to have 40% women Non-Executive Directors, or 33% women in all directorships on public-listed boards by 2026. This has had an impact and is fueling faster progress in EU member states. While the Directive will be challenging for some, the UK now exceeds the requirements, with 48% women NEDs and 42% in all directorships on FTSE 350 Boards.

4. Stakeholders

Spotlight on the Executive Search Community

The 12 Executive Search firms doing the most to fuel the increase in the number of women serving on FTSE 350 Boards are accredited this year under the Enhanced Code of Conduct. The challenge over the next two years is to step up the appointment rate and drive further gains in the four key roles and on Executive Committees.

A Complex Stakeholder Effort

The success of the Review is predicated on a complex group of stakeholders all playing their part. The list is long. FTSE 350 companies, their Chairs, CEOs and leadership teams, Government, Regulators, Investors, Executive Search firms, large and small businesses that have developed to support diversity efforts, and of course women themselves. All can play a pivotal role.

However, only a few stakeholders have the opportunity to take part in the appointment process quite so directly as the Executive Search firms, and influence outcomes. Although they act to support clients in their decision-making, they occupy a unique slot in being present at the point candidates are evaluated, and appointment decisions made.

44 The Executive Search community is also the holder of best practice and the architect of long and short lists, and design effective coaching and support mechanisms that help fuel further progress. Their support has helped meet the Women on Boards 40% target, but there is more to do in the four key roles, and at Executive Committee level, as well as sustaining the gains on public-listed boards and mitigating any risk of slipping back.

Raising the bar

With a view to fueling faster progress, and addressing the continuing skewing towards men in the appointment process, an evaluation of the Enhanced Code of Conduct is planned for 2024 with the executive search community. This will provide an opportunity to review criteria and thresholds, and capture emerging best practice. It will also look at extending the scope to include the Top 50 private companies, and potentially appointments at Executive Committee level.

Enhanced Code of Conduct

The Enhanced Code of Conduct offers a performance-based accreditation process, focussed on the appointment rate of women and men, and best practice criteria, which recognises those Executive Search firms doing most to support gender equality on FTSE 350 Boards.

The 12 firms in the table below are all accredited under The Enhanced Code of Conduct for 2023, each having met the performance criteria set out below, and best practice standards in gender-balanced selection for FTSE 350 Boards in the last 12 months.

- At least 40% of all FTSE 350 Board appointments have gone to women.
- At least four women have been appointed to FTSE 350 Boards in the 12 month period and there is a proven record of helping women achieve their first board appointment.

The search firms working with smaller FTSE listed companies, large privately owned, Government or Not-for-Profit boards, can additionally be recognised for their efforts in a separate Beyond FTSE 350 category.

Congratulations to the Executive Search firms below that have been accredited this year under the Enhanced Code of Conduct.

In the volatile and uncertain world we live in, it has never been more important for businesses to be a positive voice of hope, lifting everyone up and ensuring women do not get left behind.

Research has shown that organisations with more diverse leadership are more profitable and that the global economy could grow by £120 trillion if we allow women achieve their potential. My call to action to all business leaders is to continue the focus on women in the workplace, creating a pipeline of talent, allowing them succeed.

Change requires courage and commitment. The time for action and further progress is now. We can be faster, braver and bolder together.

Mary Macleod

And Special Thanks to...

The Steering Group are responsible for determining the strategic framework of the Review, monitoring and reporting on progress over time. All are senior business representatives, passionate and committed to the cause of advancing women and diversity in British business.

Penny James

Co-Chair

"I am honoured to be part of the FTSE wI review. It stands for inclusion, striving for gender parity at the top of British Business and equality of opportunity for women. All women. We continue to make progress towards that goal, and in a world of many competing pressures we must maintain our focus."

Nimesh Patel

Co-Chair

"The Review's success in reaching a significant milestone with Women on Boards reminds us of the difference we can make with clarity of purpose, taking accountability to drive change and remaining committed to the steps we must take every day. We have seen progress in 2023 across all dimensions, and we must now maintain focus and keep taking those steps forward."

Denise Wilson OBE

Chief Executive

"There is no shortage of experienced, capable women, ambitious for themselves and for their organisations across all sectors of business today. Yet the appointment rate remains significantly skewed in favour of men. To make further and faster progress, this needs to change."

Laura Needham

"Over the past 13 years the Review has played a significant role in increasing the number of women on Boards and in leadership positions. With just two years to go to reach the 40% women in Leadership target, it is time to reinvigorate and re-energise and pick up the pace again."

Rachel Hopcroft

"As the UK's most authoritative voice on gender equality in business, this voluntary review has driven tremendous progress. In these last two years, it's crucial we maintain that momentum and continue to increase the representation of women in all leadership roles."

Fiona Cannon OBE

"Women's representation continues to grow from strength to strength but as we approach the critical final two years, it is more imperative than ever for businesses to apply forensic attention to detail and unwavering commitment from leadership to achieve the 40% target."

Melanie Richards CBE

"Laser-like focus and transparent reporting over so many years has brought us this far and the tremendous effort that sits behind progress, year-on-year, is to be applauded. But we should not call victory until there are many more women in leadership roles and it is not considered the exception, but the norm."

One never notices what has been done,
one can only see what remains
to be done.

Marie Curie

Scientist, and founder of the Curie Institute.

The first woman awarded a Nobel Prize
(Physics in 1903, and for Chemistry in 1911)

The Recommendations

The four current Recommendations build on the work of the former Hampton-Alexander and Davies Reviews. They set expectations and aspirational goals for this next, and anticipated final stage in the journey to gender-balanced Boards, and gender-balanced Leadership teams by the end of 2025.

01

Increased Target Aiming for Gender Balance

Recommendation: The voluntary target for FTSE 350 Boards, and for FTSE 350 Leadership teams is increased to a minimum of 40% women's representation, by the end of 2025.

78

To maintain gender balance over time, and provide a degree of flexibility, companies should aim to maintain the representation of both men and of women at, or above a minimum 40% threshold.

Rationale & Progress: Voluntary targets that are realistic but stretching have been pivotal to improving women's representation in the UK. They encourage accountability, a data-driven approach and help focus on succession and the pipeline of talent further down in the organisation. Consecutive year-on-year progress achieved in the UK over a relatively short period of time has resulted in a strong cohort experienced, capable women now playing a full role on boards, and in key leadership roles in British business.

The 40% target was met for women on FTSE 350 Boards in January 2023, three years ahead of the target date, and further increased to 42.1% in January 2024.

02

Women in the Most Senior Board and Leadership Roles

Recommendation: FTSE 350 companies should have at least one woman in the Chair or Senior Independent Director role on the Board, and/or one woman in the Chief Executive Officer or Finance Director role in the company by the end of 2025.

All companies should increase their efforts to understand and remove bias from the selection process on Board and Leadership appointments.

Rationale & Progress: Women now occupy around 15% of Chair roles, and the number of women Finance Directors currently stands at 18%. Women in the Chief Executive role remain few and far between at just 8%, with flat to little progress in over a decade.

Progress in the Senior Independent Director role has been consistently good since 2017, culminating in a welcome 47% near-parity for women SIDs this year. However, with more than 42% women serving on boards, and an ever-strengthening base of experienced, capable women in senior roles, progress in three of the four roles is disappointing.

Locking in Progress on FTSE 350 Boards

Recommendation: Key stakeholders, such as the Investment community and corporate governance agencies should continue to set best-practice guidance, or have in place alternative mechanisms as appropriate, to encourage any FTSE 350 board that has not yet achieved the 33% target for 2020, to do so.

In addition, FTSE 350 Boards below 33% women, should look to the under-represented gender when considering additional appointments.

Rationale & Progress: The Investment community are increasingly adopting policies or engagement practices to align with the 33% minimum threshold, or similar. A challenge of the UK's voluntary, business-led approach is how to encourage companies slow to act, or who slip back under new leadership, and remain adrift from previous targets. To improve UK corporate governance in the round, and for the business-led framework to be a long term success, all companies need to challenge existing mindsets and practices, and play their part.

The Investment community are increasingly focused on material ESG risks, including diversity at Board and Leadership level and routinely are adopting policies, engagement and voting practices that align with the 40% target. Scrutiny from Regulatory agencies continues, and in their influential capacity Executive Search firms are encouraged to step up efforts in the next two years.

Encouraging Progress Across a Wider Spectrum of British Business

Recommendation: The scope is extended beyond FTSE 350 companies to include the largest 50 private companies in the UK by sales. This will provide consistency of regulatory approach and drive further progress across British business.

Note: Private companies includes, private equity owned companies, partnerships, entrepreneur/founder-owned, family-owned or companies owned directly by management and staff.

Rationale: The key guiding principles to determine which large private companies are included in the Top 50 Private Companies list are as follows:

A company should have an annual turnover in excess of £1 billion, a workforce of around 4000 employees, or more and be headquartered in the UK, with neither the company, nor the parent organisation listed on any UK, or overseas stock exchange. The company is likely to make a significant contribution to UK business, the economy and may have a significant consumer profile.

KPMG Connect On Board

KPMG launched Connect On Board to encourage the business community to create greater diversity on boards. Connect On Board is an online platform designed to connect non-executive director (NEDs) candidates from a diverse talent pool with organisations seeking to build better boards. From the outset the vision for Connect On Board has been to help increase the visibility of first class executives who are ready for NED positions.

If you are seeking a NED or looking for a NED role, visit www.kpmgconnectonboard.com and register your interest via the home page.

Part of the KPMG Board Leadership Centre
